Dear Sir or Madam,

I came across your multiple advertisements for roles at Emesent and I would like to submit my resume for your consideration for possibly starting discussions about the roles that are currently available, as well as future openings. I believe I would be a good fit for Emesent because I have a flexible and varied skill set, can fluidly work between hardware and software, and enjoy building relationships with users/clients. All of which is backed up and reflected with the roles and successes I've had in my recent roles. My preference is not to be siloed into a specific role/task, but thrive and enjoy wearing multiple "hats". My most recent experience working at a local tech startup company that has scaled up quickly mirrors what I see Emesent undergoing, and I would like to assist in its growth as professionally it was some of the most challenging, but enjoyable moments of my career so far.

Emesent sounds like a great place for me to progress my career, as well as providing the right culture and environment I thrive under best. I have previous experience in many of the industries that Emesent is present in and industries it could expand further into. With my experience, I feel like I could contribute in multiple areas, but specifically I would best fit in product development/management.

I am excited by the prospects of joining Emesent and continuing my professional development. I look forward to the opportunity of discussing this with you further.

Regards,

Thinh Ho
